

THE BIOBEE NEW BioArtFeed SHAKER

200gr of Premium Quality *Artemia* Cysts

- A highly nutritious feed with longer viability which enables the pre-establishment of a community of predator species.
- Accurate dispensing rate between 0.032 – 0.11 gr per shake.
- The high durability of BioArtFeed results in reduced application rates and frequencies.

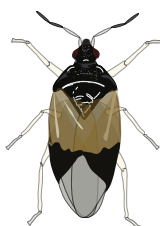

By starting biological control early on and providing good quality nutrition, it is possible to establish a “standing army” of predators on the crop, thus providing earlier and overall better pest control.

Great feed makes great predators

In contrast to *Artemia* products available on the market, BioArtFeed is suitable for all key generalist predator groups.

PREMIUM QUALITY FEED SUITABLE FOR

PREDATORY MITES (Phytoseiidae)	ORIRUS BUGS (Anthrenidae)	MIRID BUGS (Miridae)
<i>Amblyseius swirskii</i> <i>Amblyseius montdorensis</i> <i>Amblydromalus limonicus</i> <i>Neoseiulus cucumeris</i> 	<i>Orius laevigatus</i> <i>Orius insidiosus</i> <i>Orius majusculus</i> <i>Orius thripoborus</i> <i>Orius naivashae</i> 	<i>Nesidiocoris tenuis</i>
