Cyclic temperature controller

Version **1.5**

Product description

item GHL: 160-120-032800

This cyclic controller is an independent climatic control unit allowing greenhouse vent opening/closing, heating system start/stop as well as an alarm contact.

- Input voltage: 12/24 VAC
- Output voltage: 12/24 VAC
- Maximum amperage: 2 A
- Fuse inside: 2 A
- Temperature display unit: degrees Celsius (°C).
- Time display unit: secondes and minutes

Control type

Auto / Manual

Wiring

3 inputs	12/24 VAC (minimum 100VA) supply Limit swich supply Dry contact (open/close)
3 outputs	24 VAC vent signal or 2 starting 24 VAC signals (example: exhaust fans, etc.) 12 VAC alarm signal 12 VAC heating signal

Case

Case dimension 16 cm x 16 cm x 9 cm
